

1. Playwright Agents

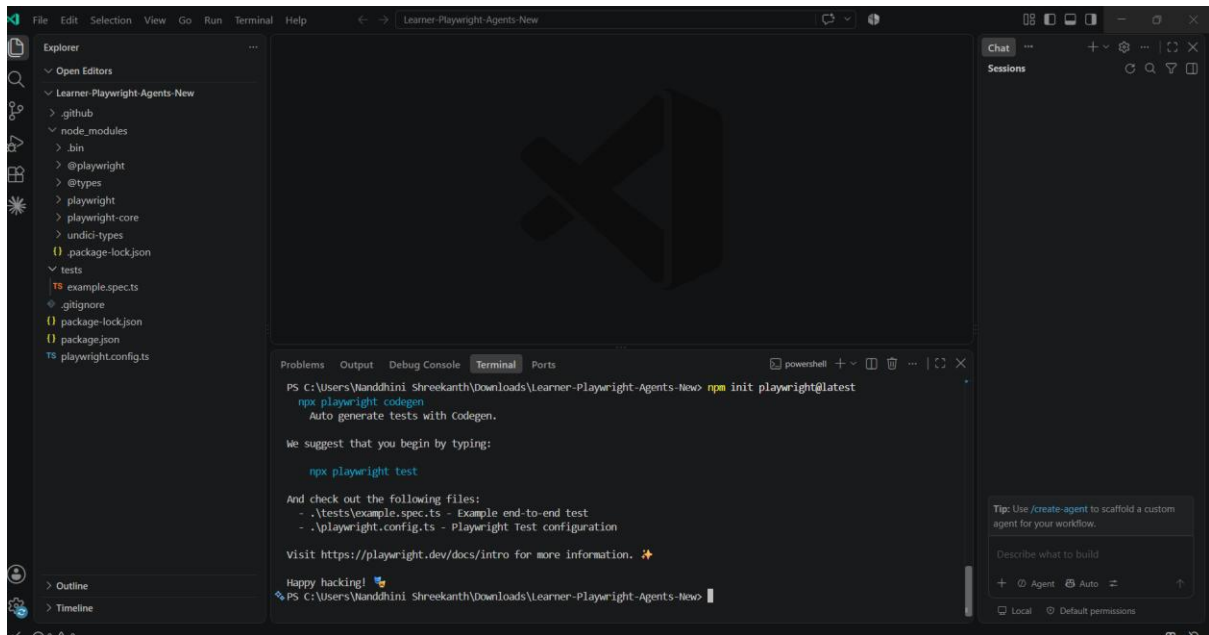

Created a folder and opened in VS code

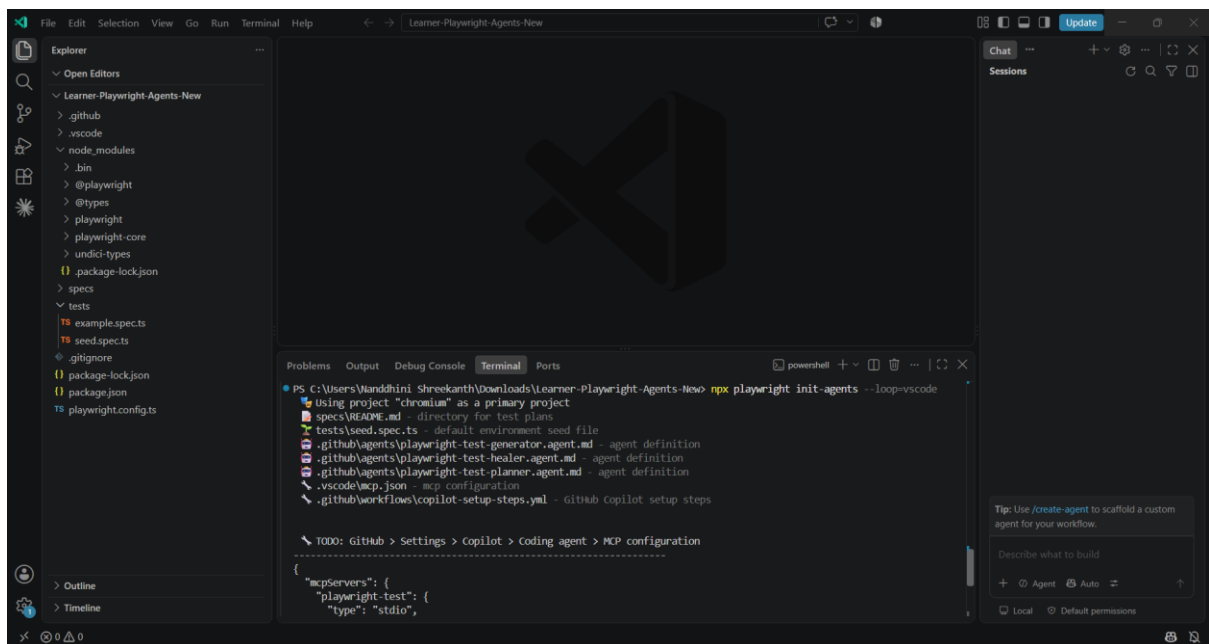

Opened the terminal and ran the `npm init playwright@latest` and gave typescript and gave the folder as tests for end to end tests and gave True for GitHub Action workflow and gave true for playwright browsers

It is installed successfully

Type `npx playwright init-agents --loop=vscode` and run in Terminal

Replacing the import { test, expect } from '@playwright/test';

```
test('seed', async ({ page }) => {
```

```
    await page.goto('https://leftaps.com/opentaps/control/main'); // Open Leftaps
```

```
await page.locator('#username').fill('DemoCSR2'); // Login

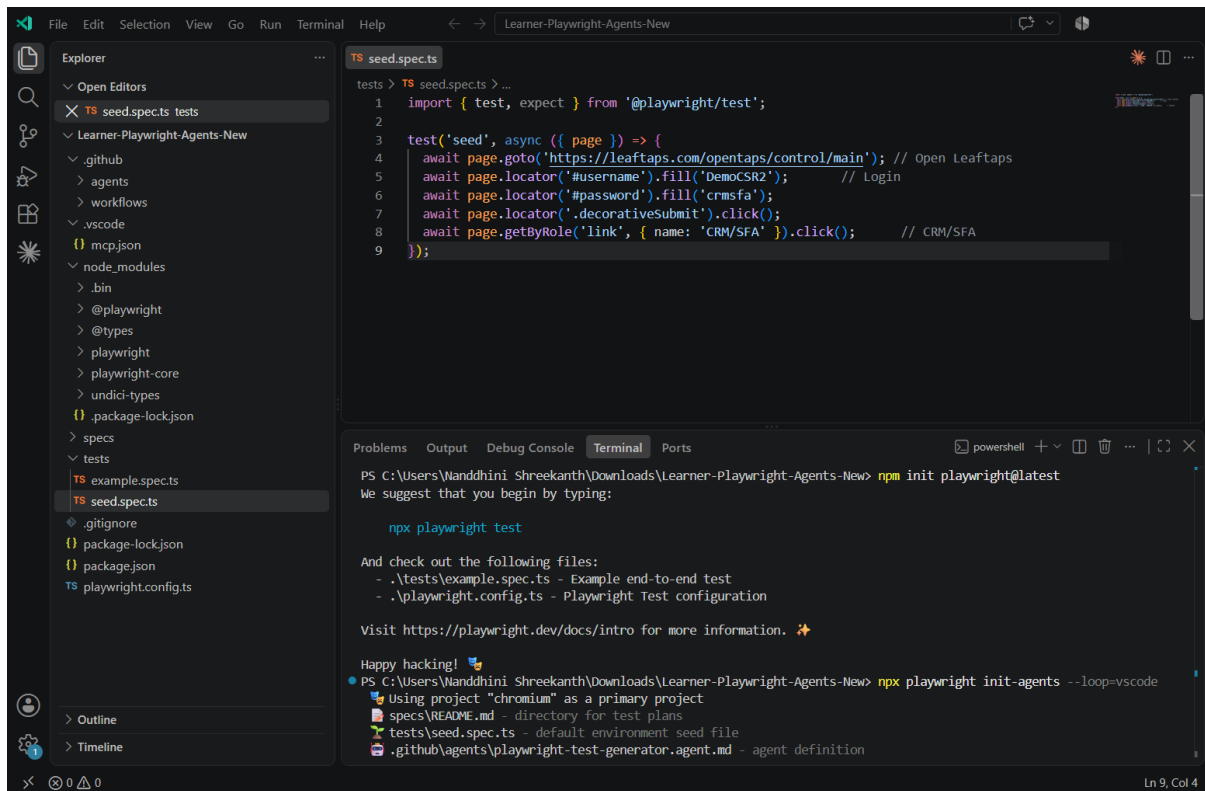

await page.locator('#password').fill('crmsfa');

await page.locator('.decorativeSubmit').click();

await page.getByRole('link', { name: 'CRM/SFA' }).click(); // CRM/SFA

});
```

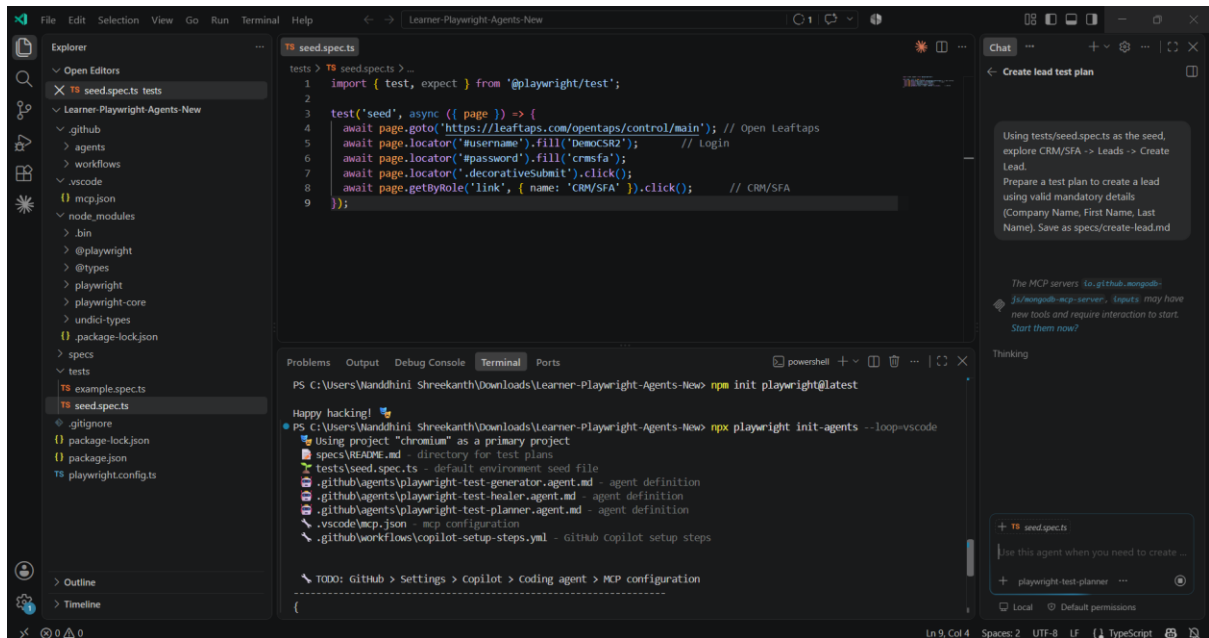

In seed.spec.ts

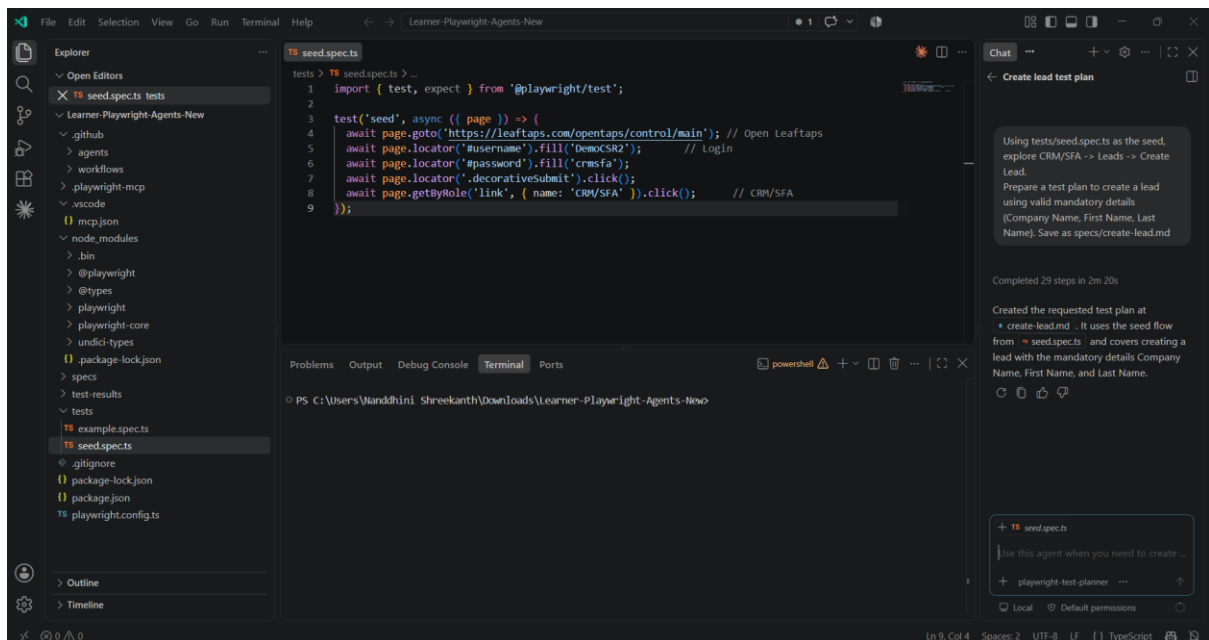

Using tests/seed.spec.ts as the seed, explore CRM/SFA -> Leads -> Create Lead.

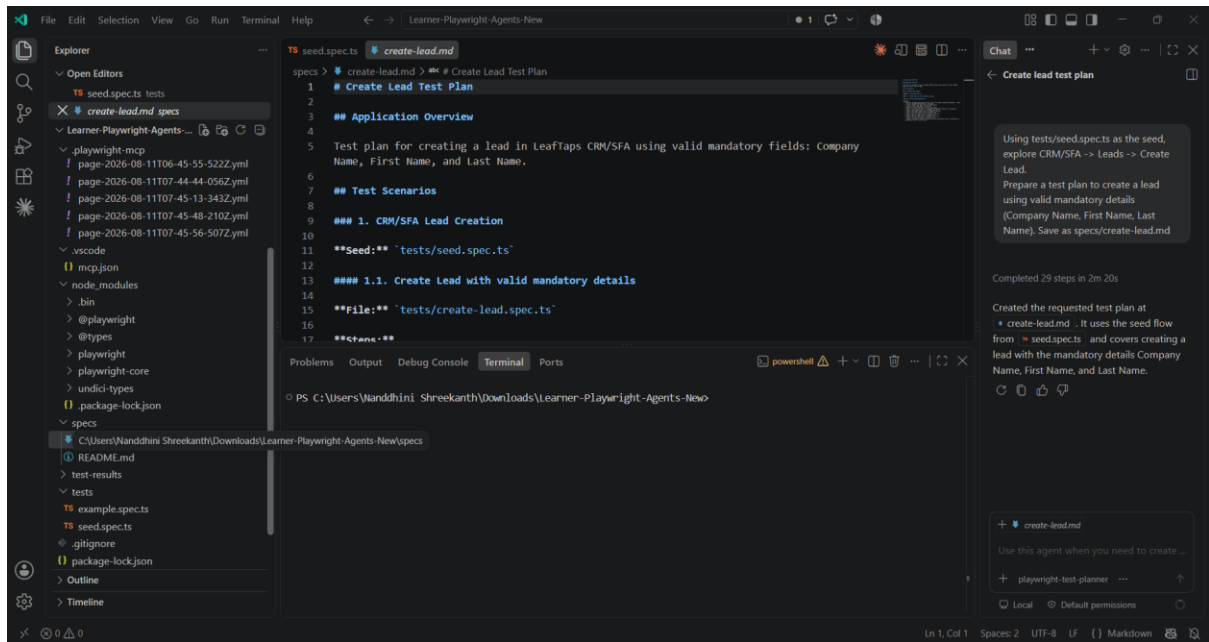

Prepare a test plan to create a lead using valid mandatory details

(Company Name, First Name, Last Name). Save as specs/create-lead.md as prompt and run in copilot

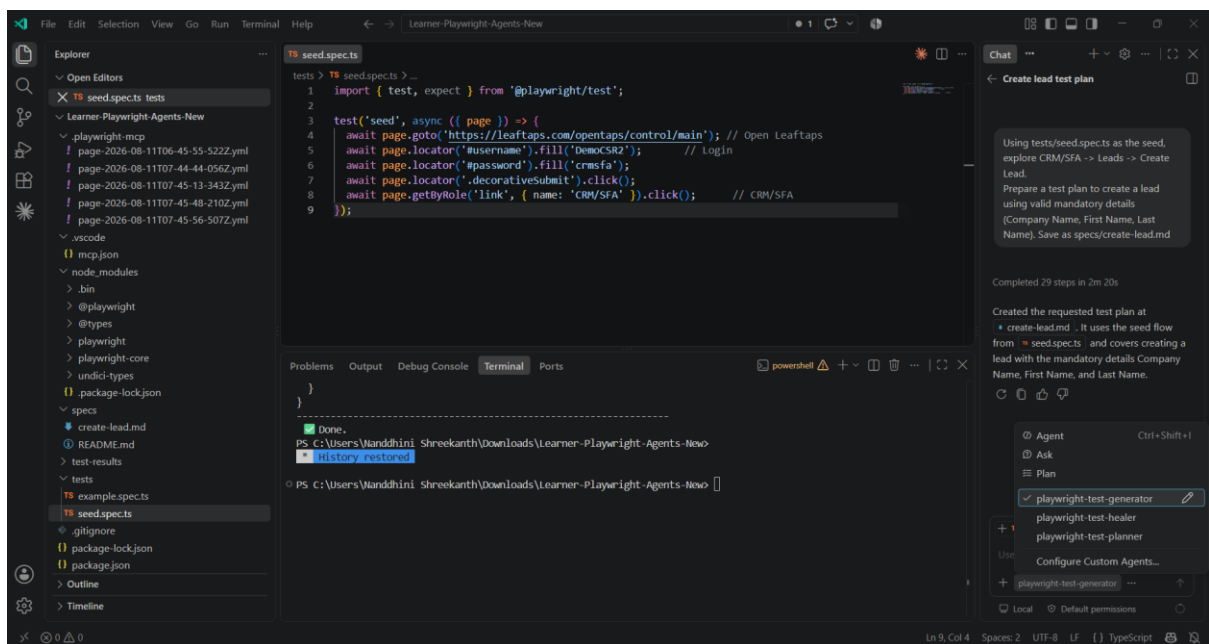

Create-lead.md file is created

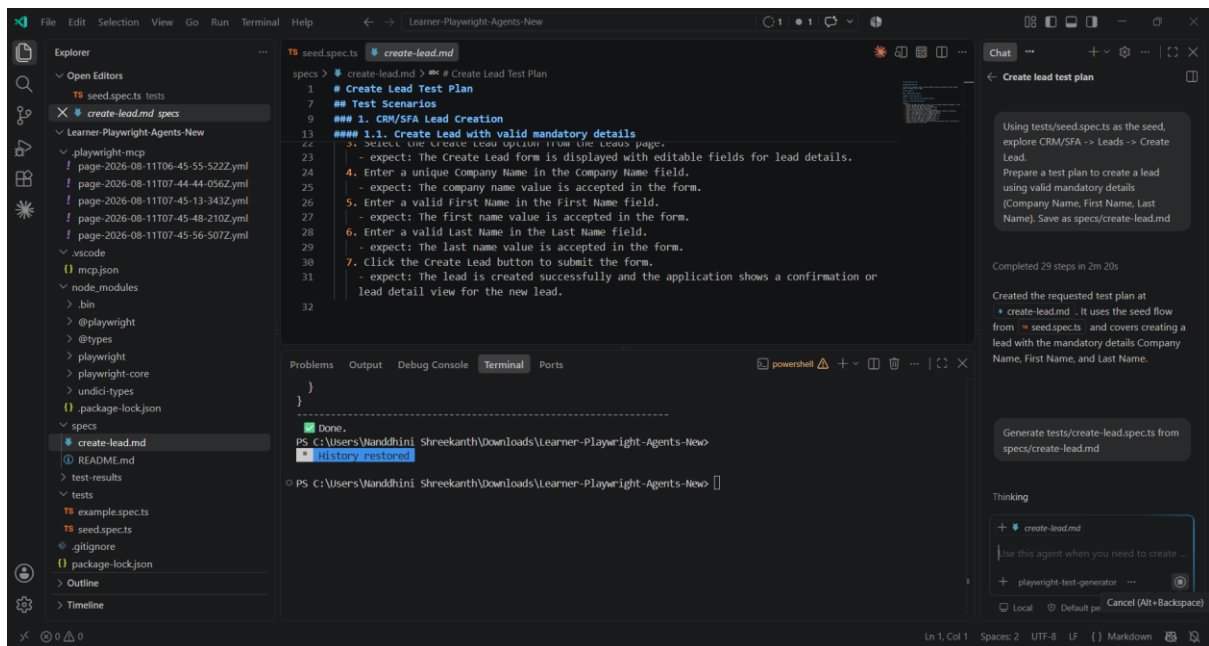

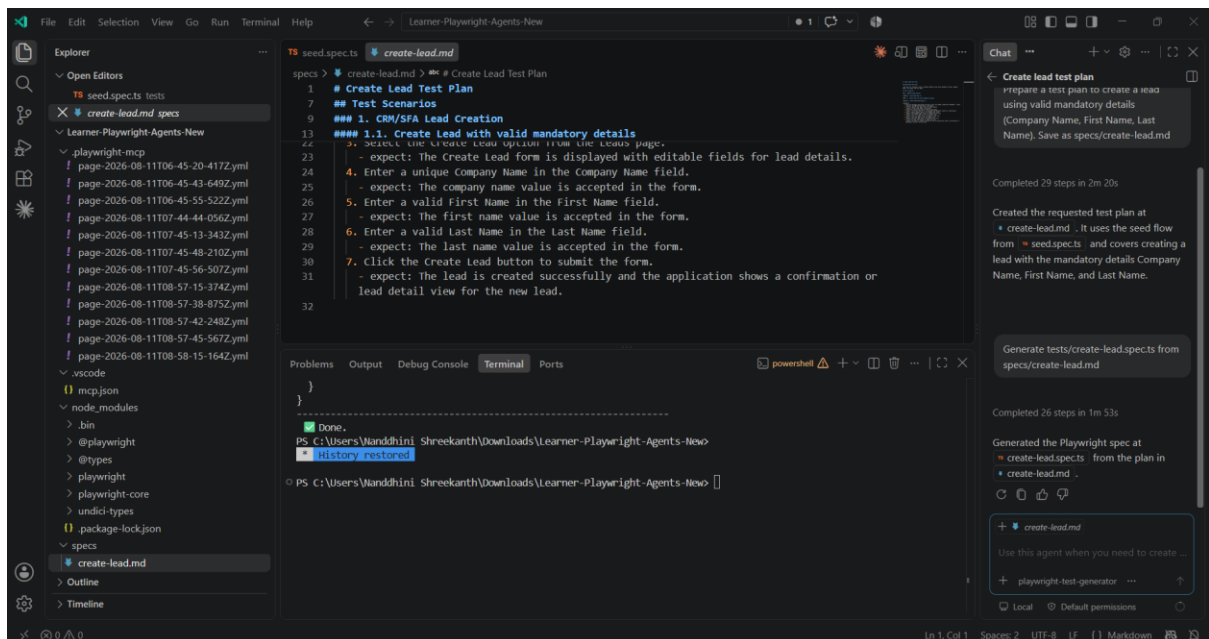

Select playwright-test-generator

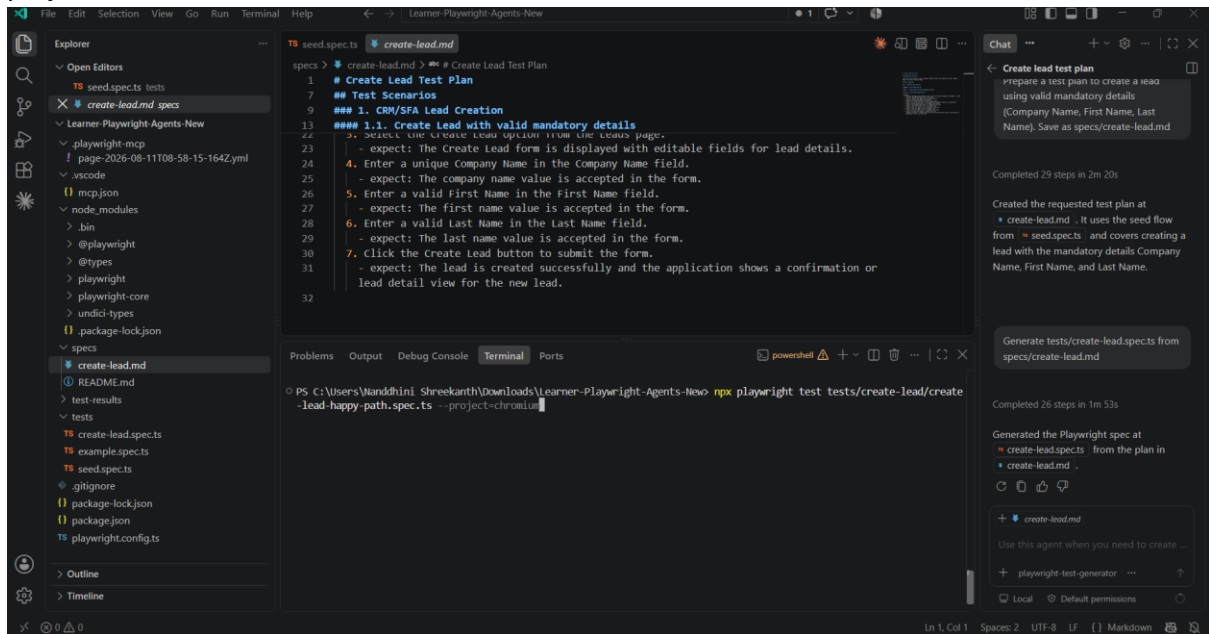

Select create-lead.md file and give the prompt as Generate tests/create-lead.spec.ts from specs/create-lead.md

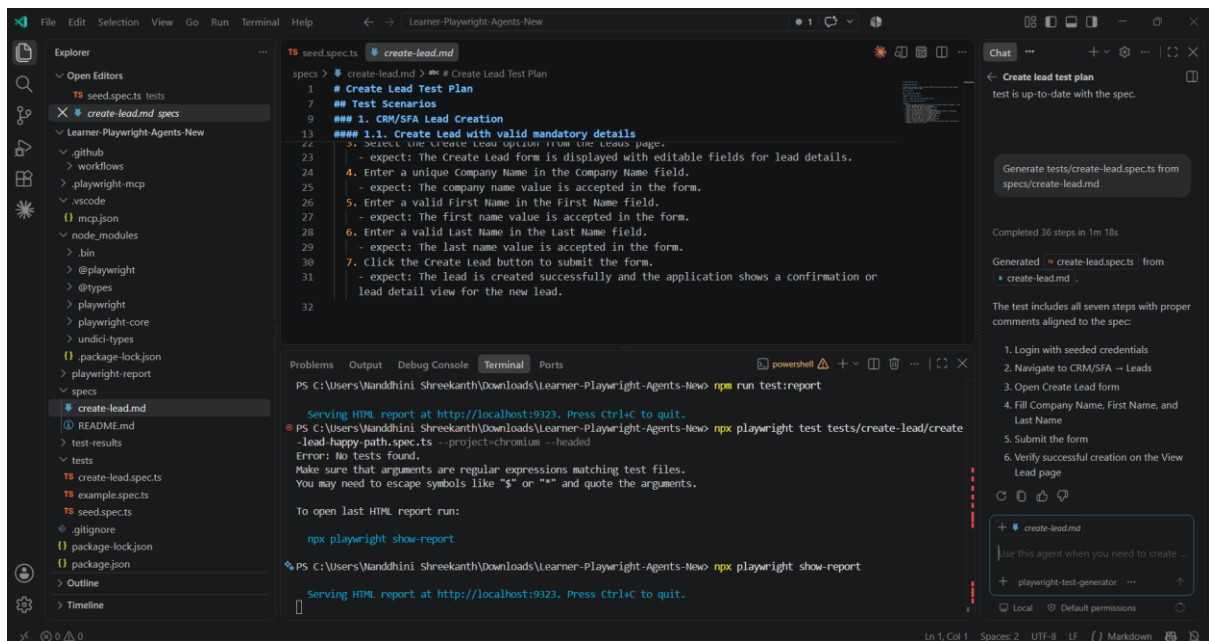

Generated the Playwright spec at create-lead.spec.ts from the plan in create-lead.md.

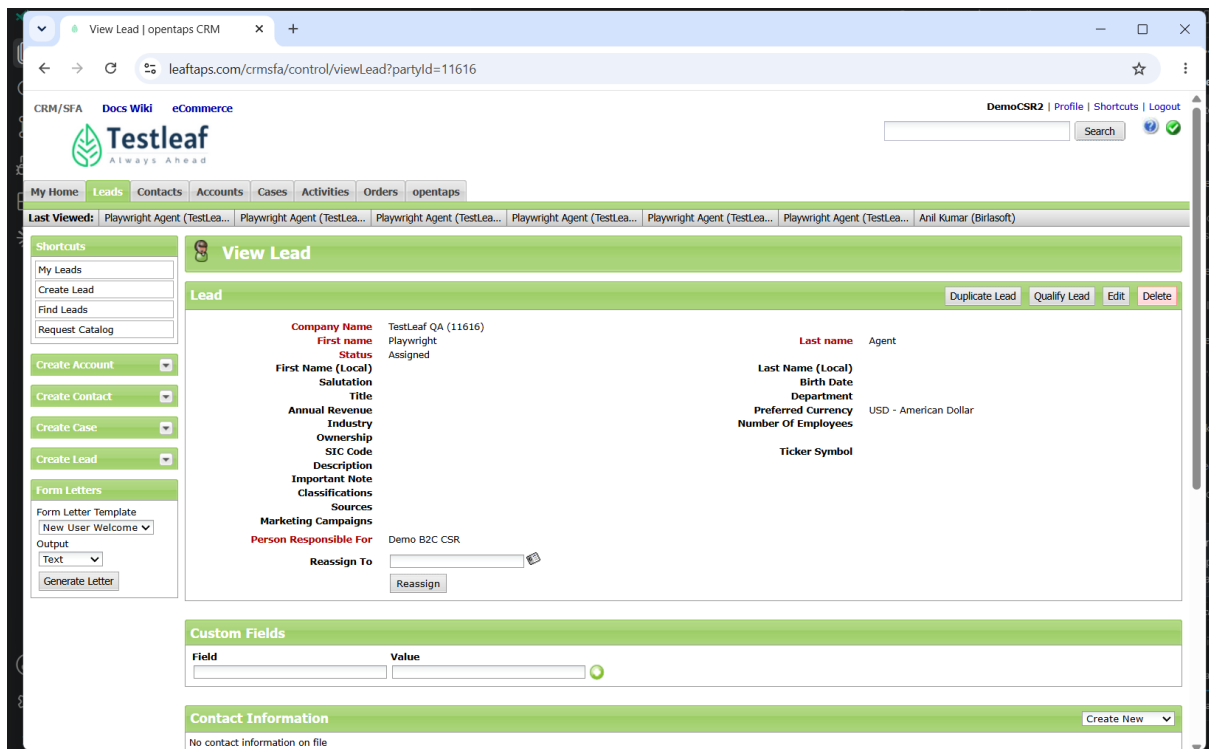

Run the npx playwright test tests/create-lead/create-lead-happy-path.spec.ts --project=chromium

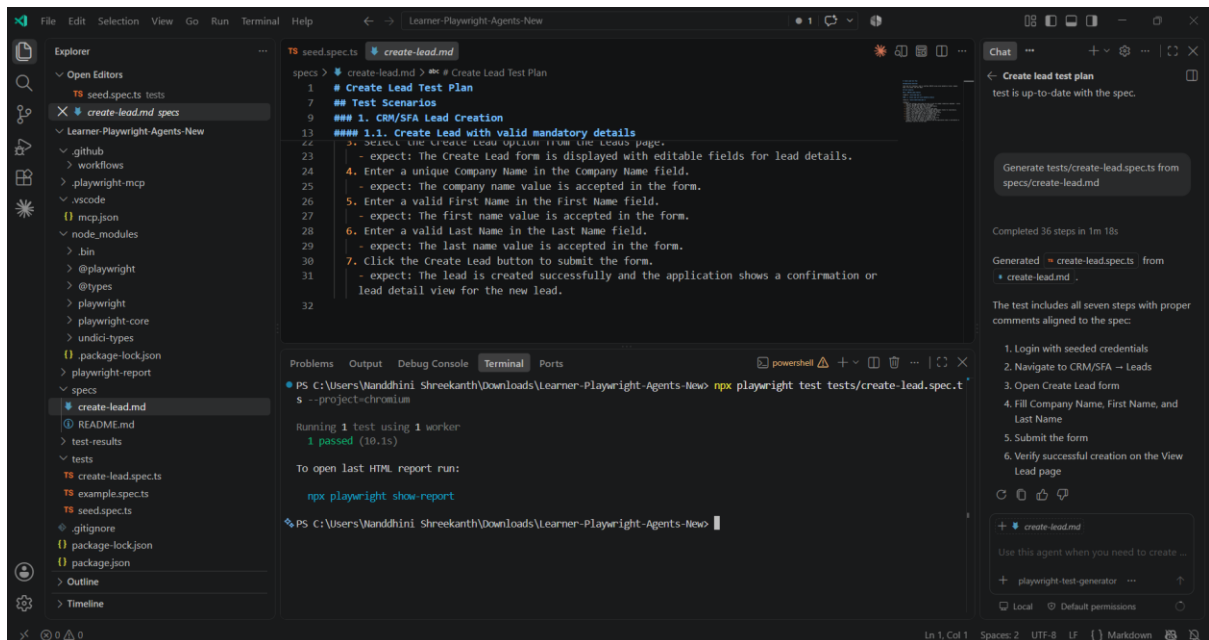

Create Lead is generated successfully

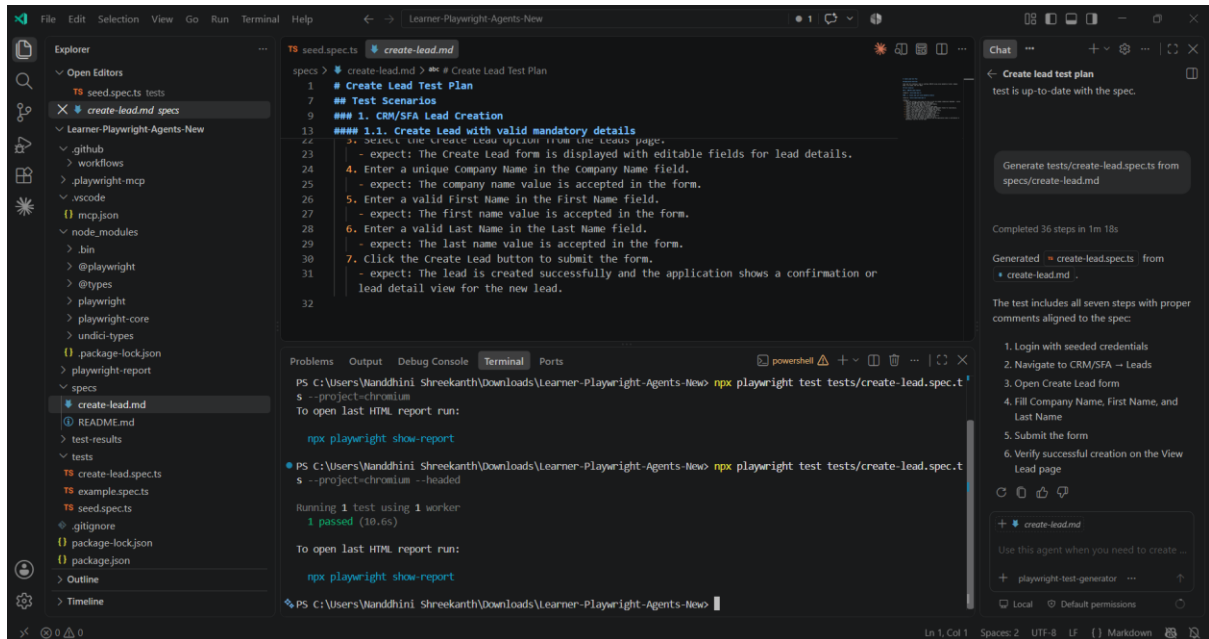

Able to see view lead after successfully created the LEAD

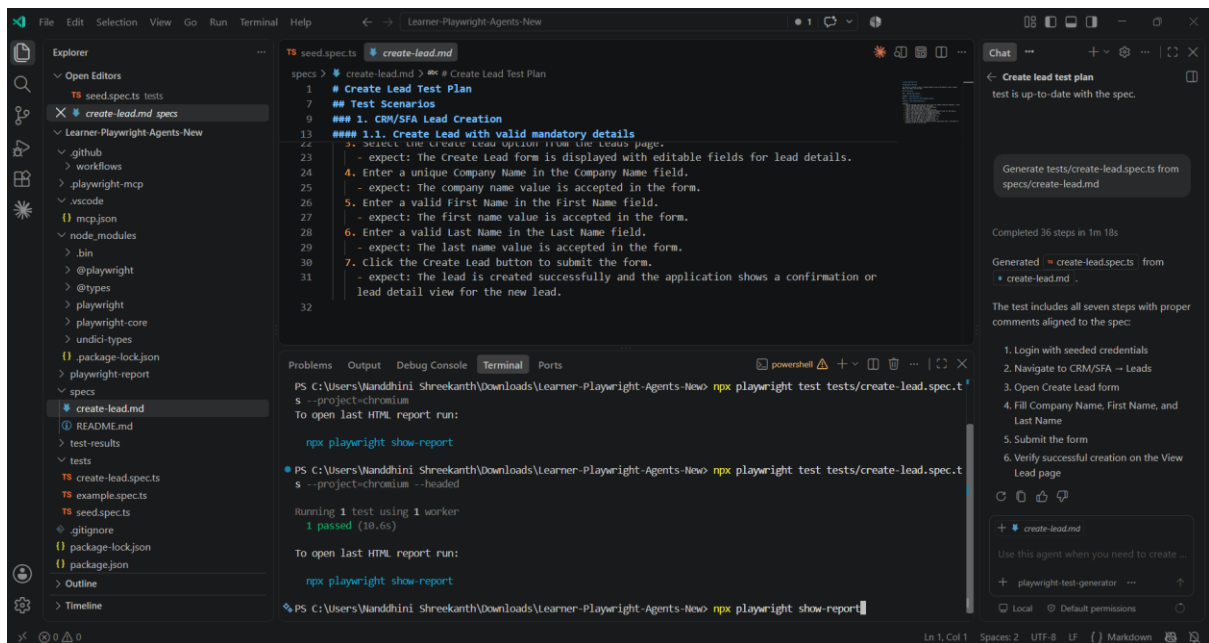

Run the npx playwright test tests/create-lead.spec.ts --project=chromium

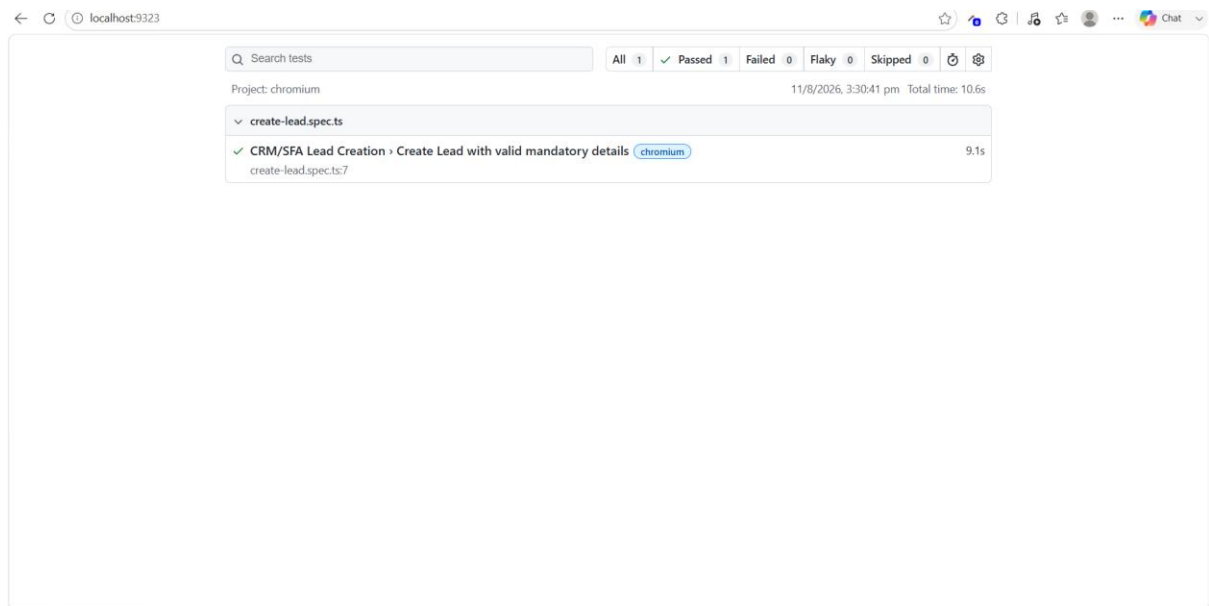

Run the npx playwright test tests/create-lead.spec.ts --project=chromium --headed

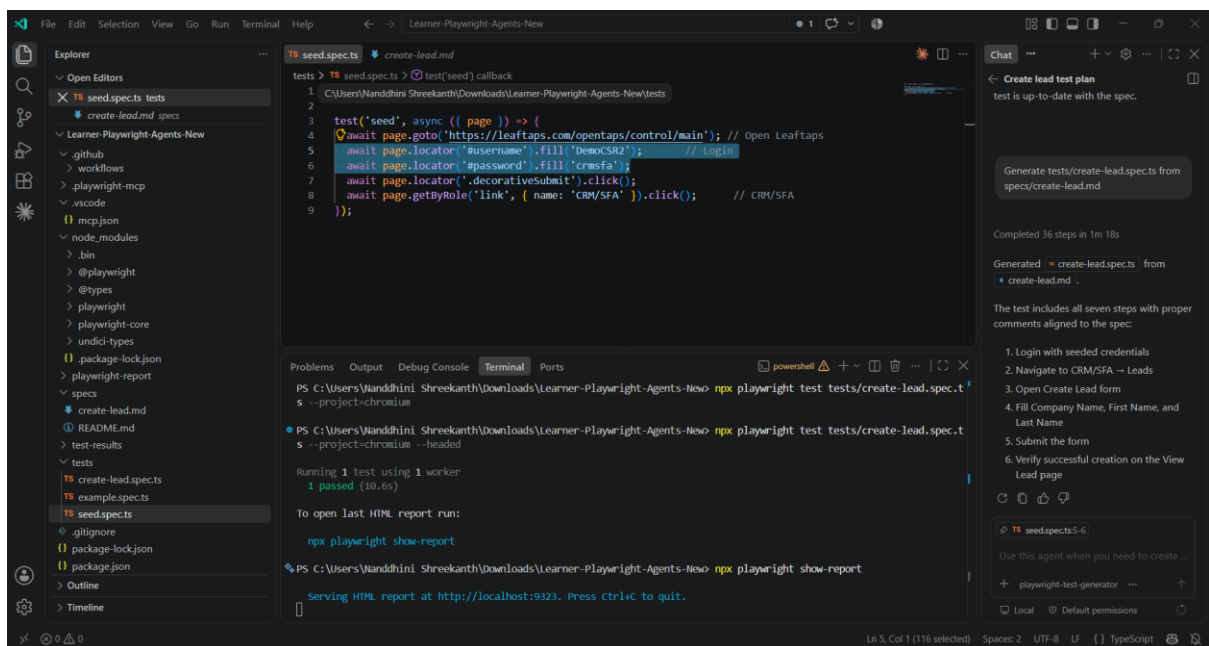

Run playwright show-report

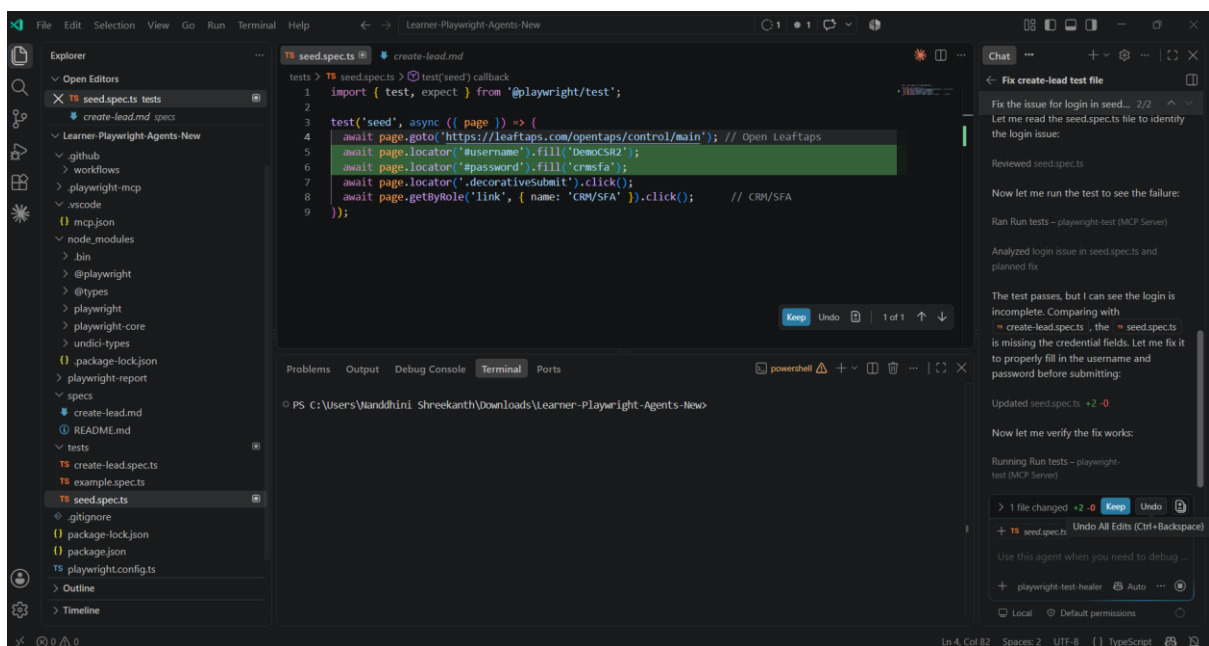

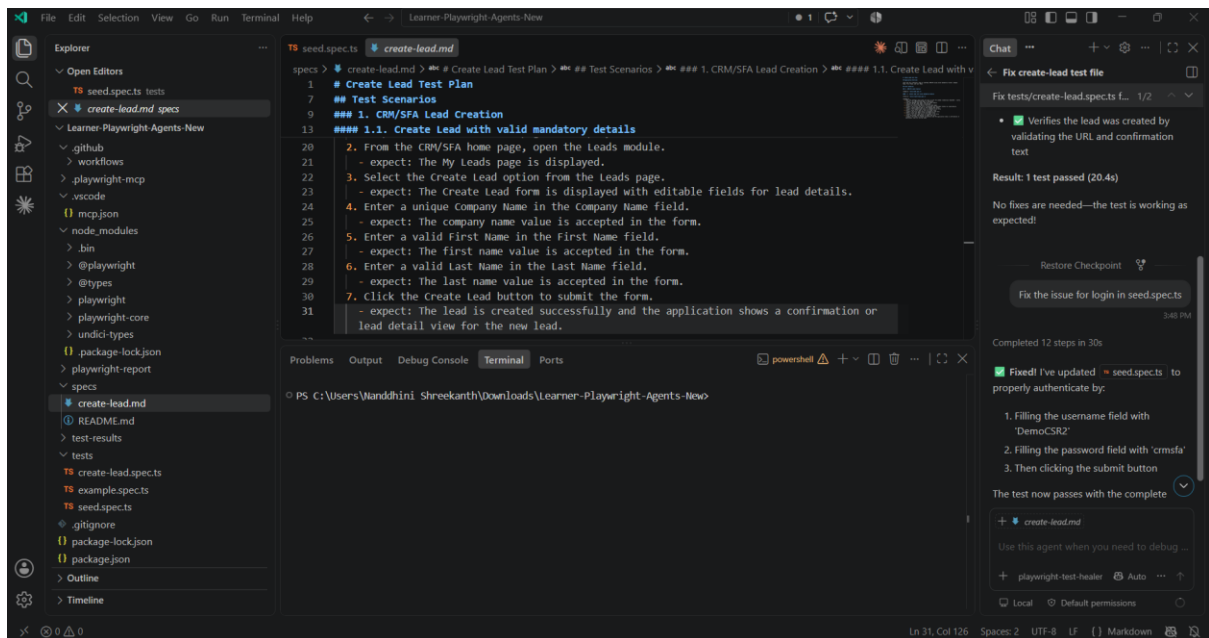

Verified the results in HTML report

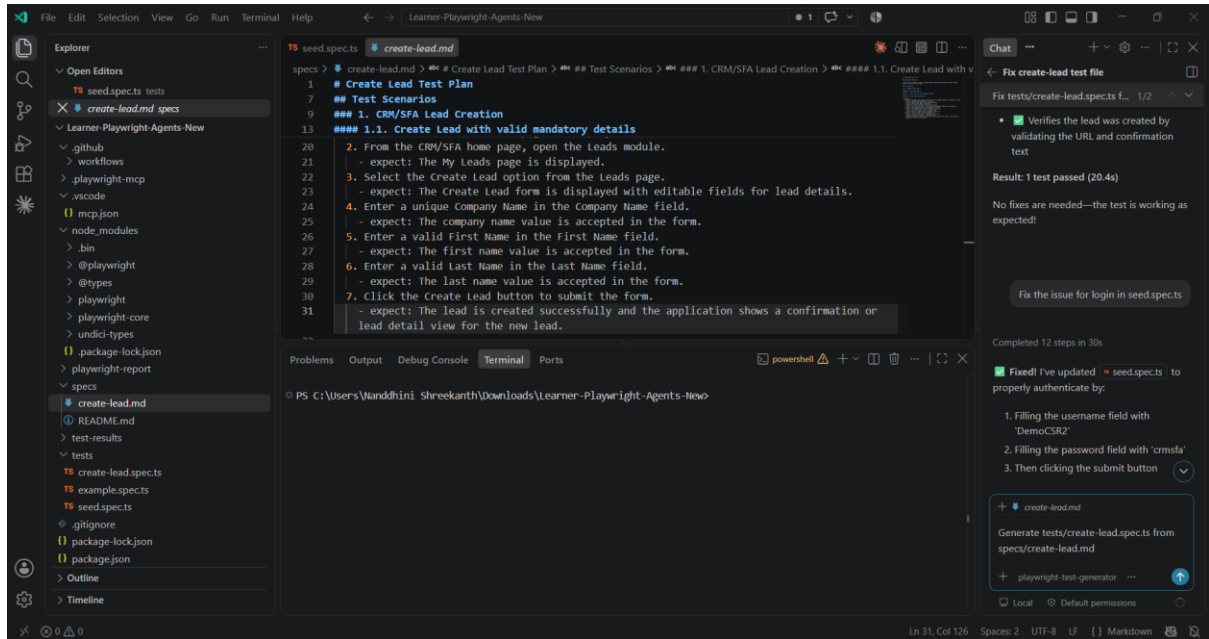

Removing the user name and password locator from seed.spec.ts

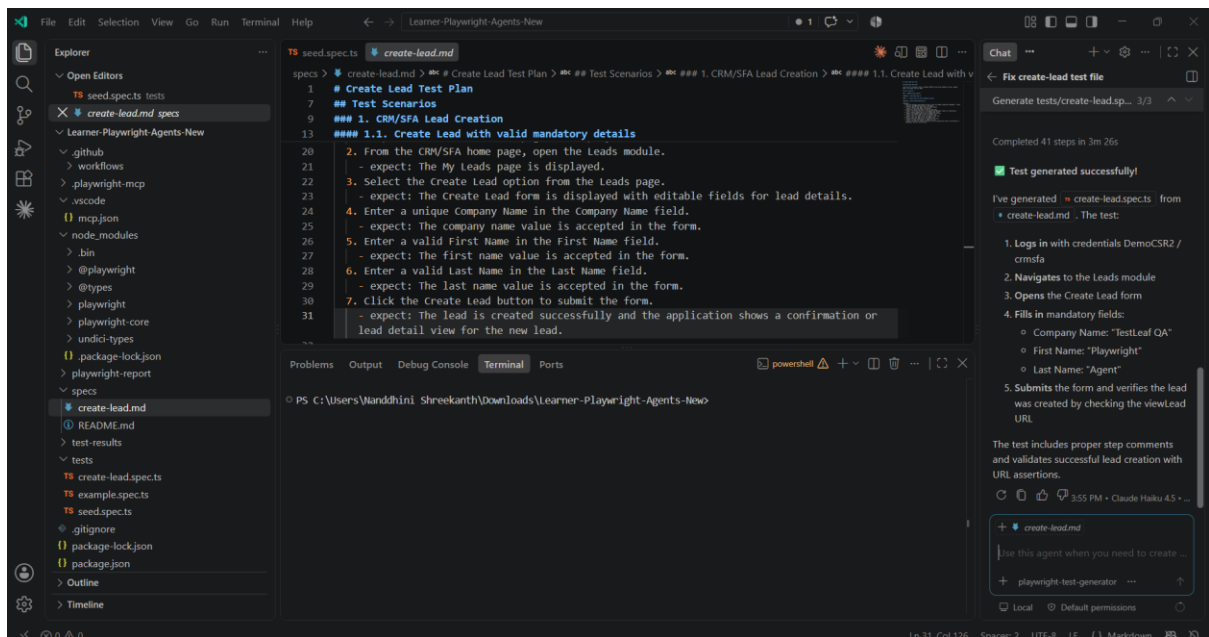

Prompt the Healer to fix the issue as “Fix the issue for login in seed.spec.js”

Again go to generator and run Generate tests/create-lead.spec.ts from specs/create-lead.md

It is generated successfully

View lead is successfully displayed

The screenshot shows the 'View Lead' page in the Testleaf CRM. The page has a green header with the Testleaf logo and navigation links. The main content area displays lead details for 'TestLeaf QA (11621)'. The details are organized into two columns. The left column includes fields for Company Name, First Name, Status, First Name (Local), Salutation, Title, Annual Revenue, Industry, Ownership, SIC Code, Description, Important Note, Classifications, Sources, Marketing Campaigns, and Person Responsible For. The right column includes fields for Last Name, Last Name (Local), Birth Date, Department, Preferred Currency, Number Of Employees, and Ticker Symbol. Below the main details, there is a 'Custom Fields' section with a table for Field and Value. At the bottom, there is a 'Contact Information' section with a 'Create New' button.

Field	Value

Run the npx playwright test tests/create-lead.spec.ts --project=chromium

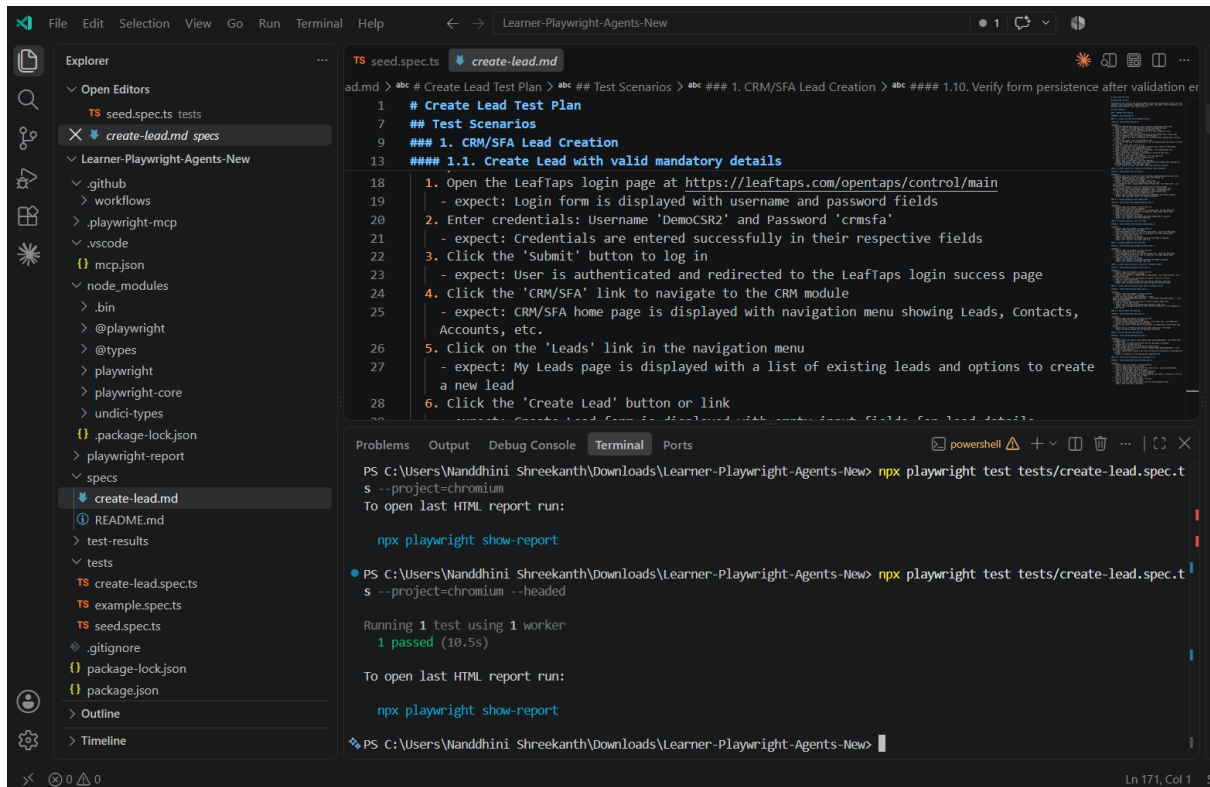

The screenshot shows a VS Code editor with a Playwright test file named 'create-lead.spec.ts'. The file contains a test plan and several test scenarios. The test scenarios are:

- 1. CRM/SFA Lead Creation
- 1.1. Create Lead with valid mandatory details

The test scenarios are defined with a list of steps and expectations. The terminal output shows the command 'npx playwright test tests/create-lead.spec.ts --project=chromium' being executed, and the result is '1 passed (10.6s)'.

```

2  ## Test Scenarios
3  ## 1. CRM/SFA Lead Creation
4  ## 1.1. Create Lead with valid mandatory details
5
6  1. Open the LeafTaps login page at https://leafTaps.com/opentaps/control/main
7    - expect: Login form is displayed with username and password fields
8
9  2. Enter credentials: Username 'DemoCSR2' and Password 'crmsfa'
10   - expect: Credentials are entered successfully in their respective fields
11
12  3. Click the 'Submit' button to log in
13   - expect: User is authenticated and redirected to the LeafTaps login success page
14
15  4. Click the 'CRM/SFA' link to navigate to the CRM module
16   - expect: CRM/SFA home page is displayed with navigation menu showing Leads, Contacts, Accounts, etc.
17
18  5. Click on the 'Leads' link in the navigation menu
19   - expect: My Leads page is displayed with a list of existing leads and options to create a new lead
20
21  6. Click the 'Create Lead' button on link
```

Ran the npx playwright test tests/create-lead.spec.ts --project=chromium --headed

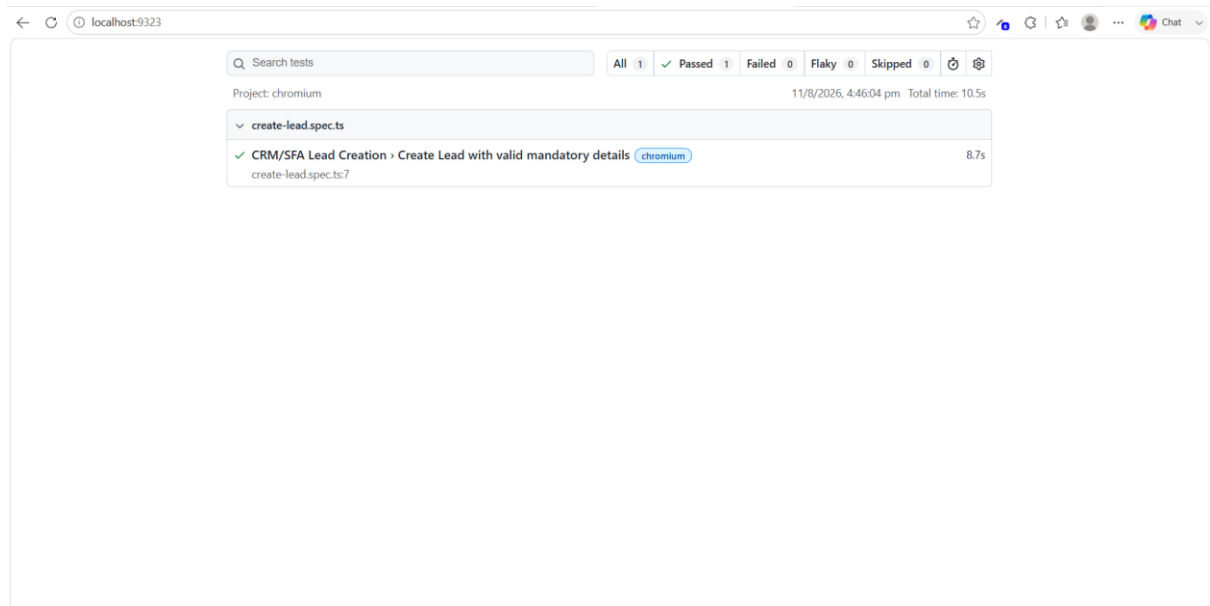

The screenshot shows the Visual Studio Code editor with the file explorer on the left, the editor window in the center, and the terminal at the bottom. The file explorer shows the project structure, including the 'tests' folder and the 'create-lead.spec.ts' file. The editor window displays the content of 'create-lead.spec.ts', which is a Playwright test file. The terminal shows the command 'npx playwright test tests/create-lead.spec.ts --project=chromium --headed' being executed, and the output indicates that the test passed successfully.

9  ### 1. CRM/SFA Lead Creation
13 ### 1.1. Create Lead with valid mandatory details
18
19   1. Open the LeafTaps login page at https://leaptaps.com/opentaps/control/main
20     - expect: Login form is displayed with username and password fields
21   2. Enter credentials: Username 'DemoCSR2' and Password 'crmsfa'
22     - expect: Credentials are entered successfully in their respective fields
23   3. Click the 'Submit' button to log in
24     - expect: User is authenticated and redirected to the LeafTaps login success page
25   4. Click the 'CRM/SFA' link to navigate to the CRM module
26     - expect: CRM/SFA home page is displayed with navigation menu showing Leads, Contacts,
27       Accounts, etc.
28   5. Click on the 'Leads' link in the navigation menu
29     - expect: My Leads page is displayed with a list of existing leads and options to create
30       a new lead
31   6. Click the 'Create Lead' button or link
32     - expect: Create Lead form is displayed with mandatory fields for Lead details.
```

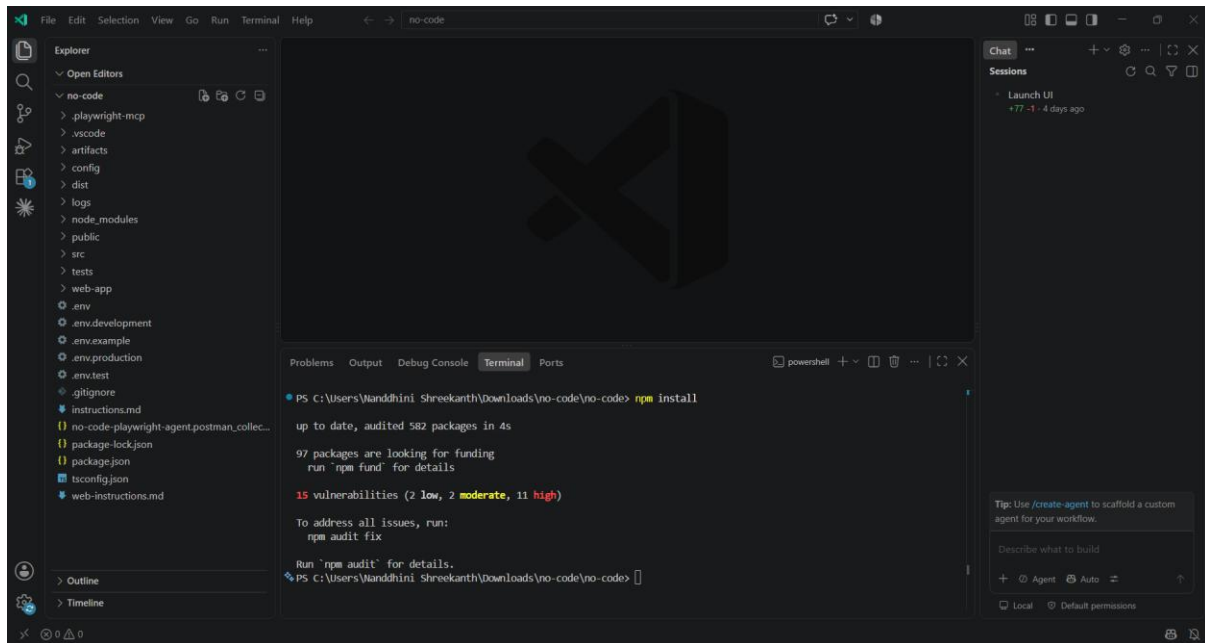

```
PS C:\Users\Wanddhini Shreekanth\Downloads\Learner-Playwright-Agents-New> npx playwright test tests/create-lead.spec.ts --project=chromium --headed
To open last HTML report run:
npx playwright show-report
Running 1 test using 1 worker
1 passed (10.5s)
To open last HTML report run:
npx playwright show-report
PS C:\Users\Wanddhini Shreekanth\Downloads\Learner-Playwright-Agents-New>
```

Verified the HTML report

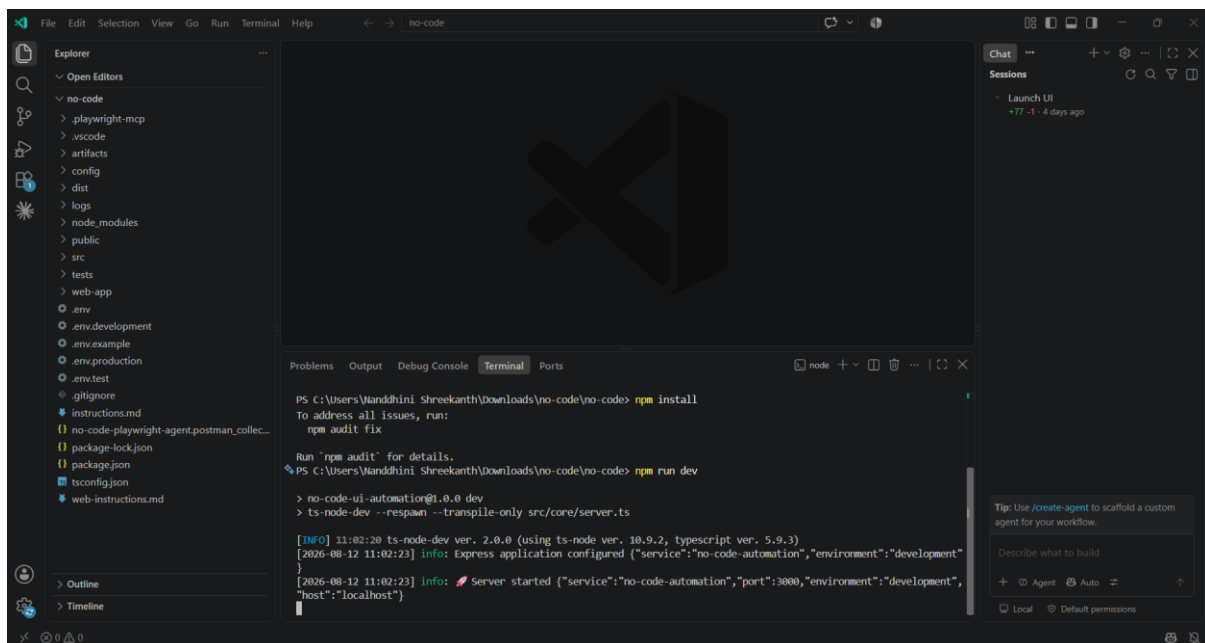

2. No Code

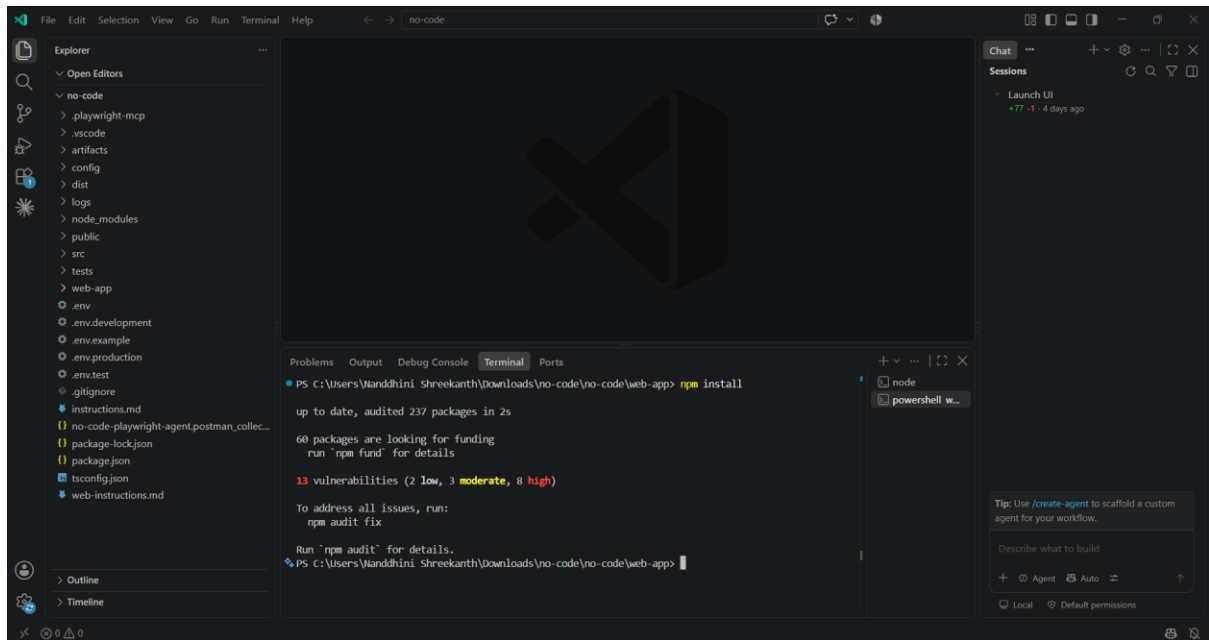

Run the npm install in main folder

Run the npm run dev in main folder

Run the npm install with the webapp folder

The screenshot shows the Visual Studio Code interface with the Explorer sidebar on the left displaying the file structure of a project named 'no-code'. The main editor area shows a large, faint 'X' logo. The bottom panel contains the Terminal, which displays the output of the command 'npm install' executed in the 'web-app' directory. The output indicates that 60 packages were installed, audited 237 packages in 2 seconds, and found 13 vulnerabilities (2 low, 3 moderate, 8 high). It also suggests running 'npm audit fix' to address the issues. The right sidebar shows the Chat panel with a 'Launch UI' session.

```
PS C:\Users\Wandhini Shreekanth\Downloads\no-code\no-code\web-app> npm install

up to date, audited 237 packages in 2s

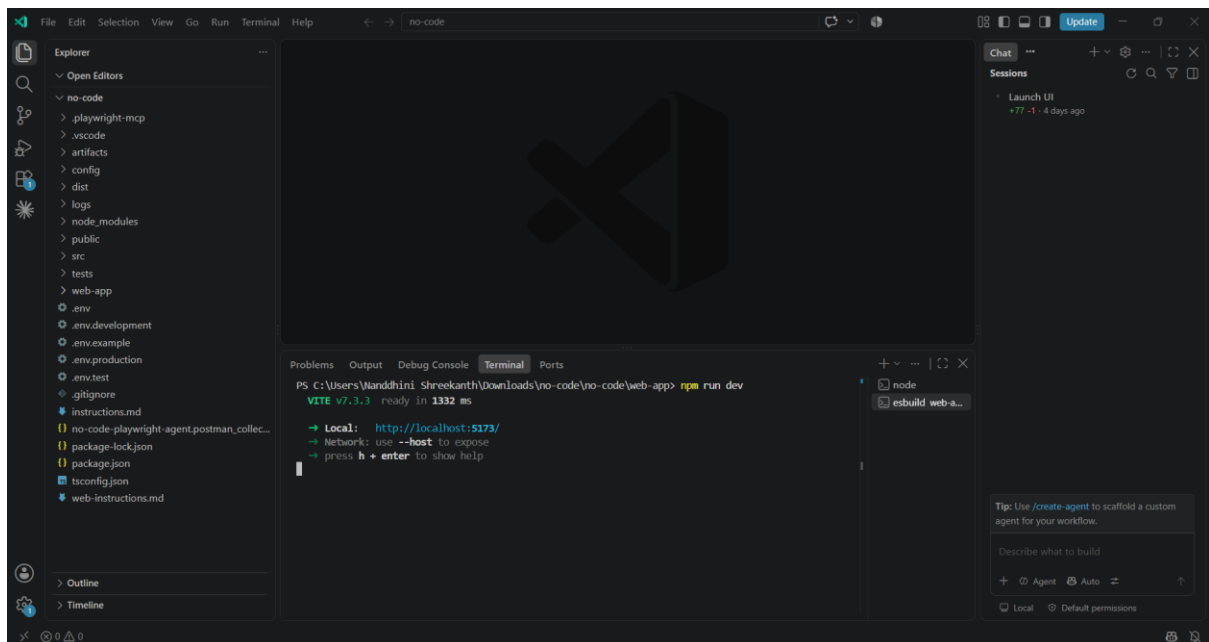

60 packages are looking for funding
  run `npm fund` for details

13 vulnerabilities (2 low, 3 moderate, 8 high)

To address all issues, run:
  npm audit fix

Run `npm audit` for details.
PS C:\Users\Wandhini Shreekanth\Downloads\no-code\no-code\web-app>
```

Run the npm run dev with the webapp folder

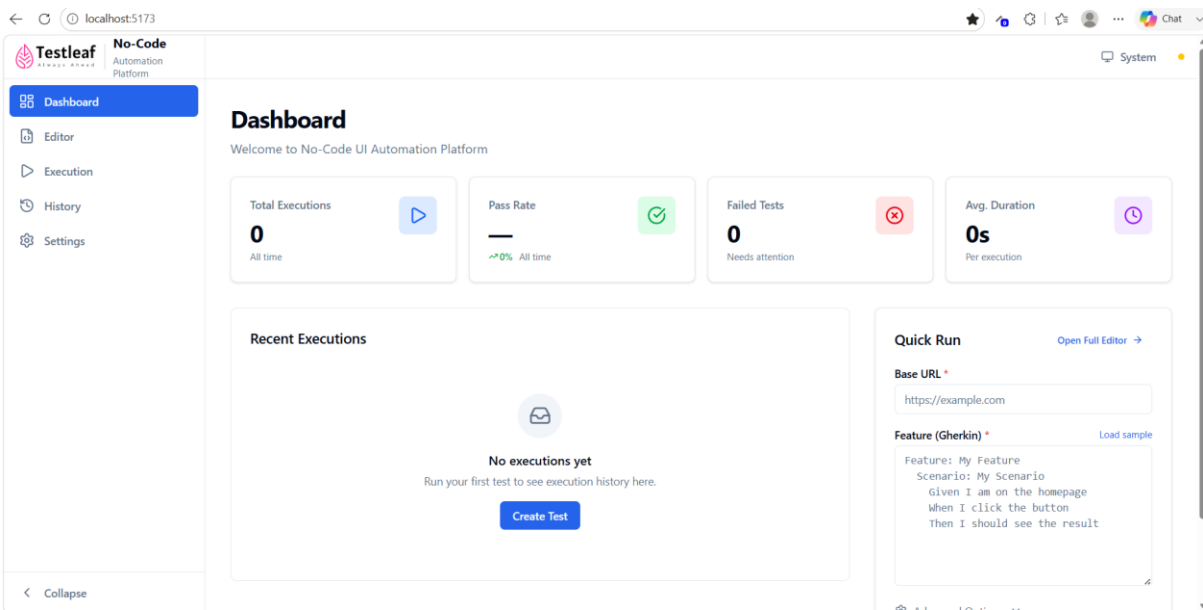

The screenshot shows the Visual Studio Code interface with the Explorer sidebar on the left displaying the file structure of a project named 'no-code'. The main editor area shows a large, faint 'X' logo. The bottom panel contains the Terminal, which displays the output of the command 'npm run dev' executed in the 'web-app' directory. The output shows that Vite v7.3.3 is ready in 1332 ms and provides the local URL 'http://localhost:5173/'. It also includes instructions for network access and how to show help. The right sidebar shows the Chat panel with a 'Launch UI' session.

```
PS C:\Users\Wandhini Shreekanth\Downloads\no-code\no-code\web-app> npm run dev

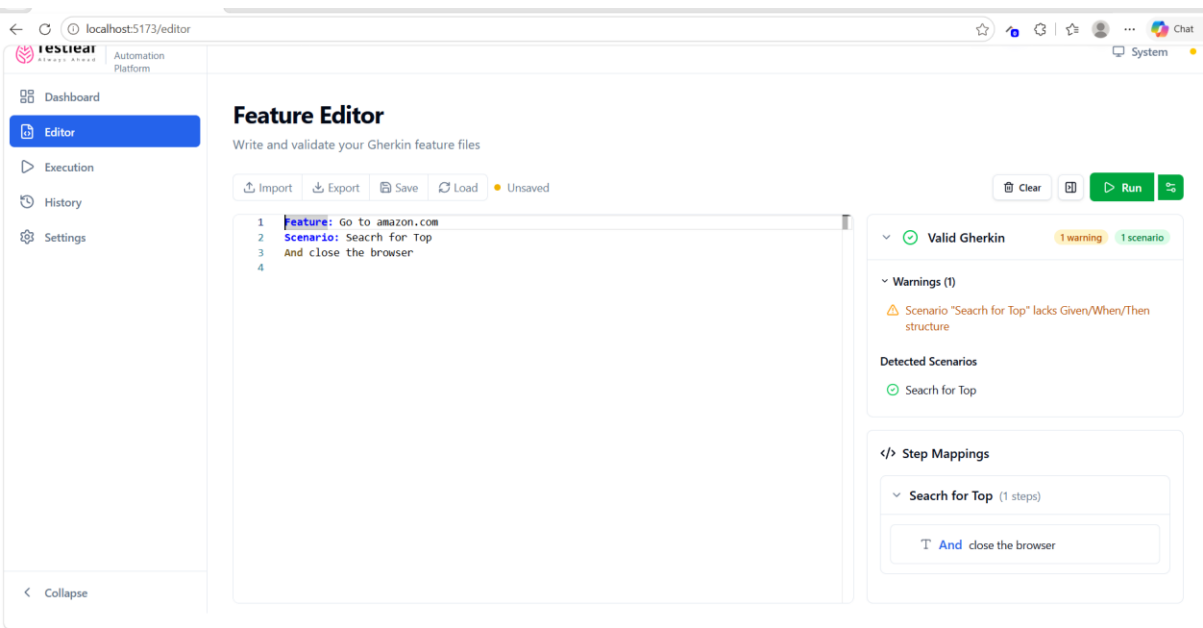

VITE v7.3.3 ready in 1332 ms

➔ Local:   http://localhost:5173/
➔ Network: use --host to expose
➔ press h + enter to show help
```
